Subject Curriculum Intent: 'Excellence in Global Perspectives '

Cambridge Global Perspectives provides opportunities for enquiry into, and reflection on, key global issues from different perspectives: personal, local, national and global. The Cambridge Global Perspectives course also encourages awareness of global problems and offers a range of opportunities to explore solutions through cooperation and collaboration. This course is not about getting everybody to think identically; rather it is a matter of opening minds to the complexity of the world and of human thought, and encouraging empathy for the diversity of human experience and feeling.

SIH Global Perspectives students learn to:

- *Research, analyse and evaluate information.*
- *Develop and justify a line of reasoning.*
- *Reflect on processes and outcomes.*
- *Communicate information and reasoning.*
- *Collaborate to achieve a common outcome.*
